

I Claim:

1. A liner ensemble for use with a bathing facility having a drain, the liner ensemble comprising:

a liner having an exterior side, an interior side, a bottom and sidewalls, said liner being removably disposed in the bathing facility and at least partially following a contour of the bathing facility; and

a fastener attached to said exterior side of said liner for securing said liner to the bathing facility, said liner being removable from the bathing facility by disengaging said fastener from the bathing facility.

2. The liner ensemble according to claim 1, wherein said liner is removed from said bathing facility by peeling said liner off of said bathing facility.

3. The liner ensemble according to claim 2, wherein said fastener is an adhesive having an adhesive cover disposed on said exterior side of said liner, said adhesive cover being removed from said adhesive for allowing the adhesive to secure to the bathing facility.

4. The liner ensemble according to claim 3, wherein said adhesive is in a form of adhesive strips disposed spaced apart on said exterior side of said liner.

5. The liner ensemble according to claim 3, wherein said adhesive is in a form of adhesive patches disposed spaced apart on said exterior side of said liner.

6. The liner ensemble according to claim 4, wherein at least one of said adhesive strips extends beyond said liner for attachment to the bathing facility.

7. The liner ensemble according to claim 1, wherein said bottom of said liner is formed of a water impervious material.

8. The liner ensemble according to claim 1, wherein said liner is formed of a water impervious material defining said exterior side of said liner and a mat disposed on at least part of said water impervious material defining said bottom.

9. The liner ensemble according to claim 8, wherein said water impervious material fully encloses said mat in a sandwich type format.

10. The liner ensemble according to claim 9, wherein said water impervious material has a roughened surface.

11. The liner ensemble according to claim 1, wherein said liner has a hole formed therein in an area of the drain and a drain cover attached to said liner covering said hole.

12. The liner ensemble according to claim 11, further comprising a ripcord connected to said drain cover.

13. The liner ensemble according to claim 11, wherein said ripcord is substantially disposed around a circumference of said hole.

14. The liner ensemble according to claim 1, further comprising a dispenser attached to said liner.

15. The liner ensemble according to claim 1, wherein said dispenser contains a material selected from the group consisting of soap, scent, bubble bath, bath oil, body lotion, moisturizer, and color dye.

16. The liner ensemble according to claim 1, wherein said liner has a surface with a decorative pattern.

17. The liner ensemble according to claim 1, wherein said liner has a surface with animal shapes embossed therein.

18. The liner ensemble according to claim 8, wherein said sidewalls are formed from said water impervious material but do not include said mat.

19. The liner ensemble according to claim 8, wherein said water impervious material is a plastic and said mat is formed of a material selected from the group consisting of cloth, fabric, sponge and a compressive material.

20. The liner ensemble according to claim 1, wherein said liner is less than 1/32 inches thick.

21. The liner ensemble according to claim 1, wherein said liner is less than 1/64 inches thick.

22. The liner ensemble according to claim 1, further comprising a ripcord embedded in said liner for creating a hole in an area of the drain when the ripcord is pulled.

23. The liner ensemble according to claim 1, wherein said liner is coated with a material selected from the group consisting of soap, scent, bubble bath, bath oil, body lotion, moisturizer, and color dye.

24. A liner ensemble for use with a bathing facility having a drain, the liner ensemble comprising:

a liner having an exterior side, an interior side, a bottom and sidewalls, said liner being removably disposed in the bathing facility and at least partially following a contour of the bathing facility; and

a covered adhesive attached to said exterior side of said liner for securing said liner to the bathing facility, said liner being removable from the bathing facility by peeling said liner from the bathing facility.

25. A liner ensemble, comprising:

a liner having a bottom with an exterior side and an interior side, said liner being removably disposable in a bathing facility; and

a fastener attached to said exterior side of said liner for securing said liner to the bathing facility, said liner being removable from said bathing facility by disengaging said fastener from the bathing facility.

26. The liner ensemble according to claim 25, wherein said liner has a rectangular shape.

27. The liner ensemble according to claim 25, wherein said liner has sidewalls extending from said bottom and being less than 2 inches high.

28. The liner ensemble according to claim 25, wherein said liner has a hole formed therein functioning as a drain.

29. The liner ensemble according to claim 25, wherein said fastener is an adhesive having an adhesive cover disposed on said exterior side of said liner, said adhesive cover being removed from said adhesive for allowing the adhesive to secure to the bathing facility.

30. The liner ensemble according to claim 29, wherein said adhesive is in a form of adhesive strips disposed spaced apart on said exterior side of said liner.

31. The liner ensemble according to claim 25, wherein said liner is formed of a water resistance layer defining said exterior side and a fabric layer defining said interior side.

32. The liner ensemble according to claim 31, wherein said fabric layer is an imprinted fabric layer.
